

SKUNK SCAVENGER HUNT!

Skunks are usually black and white, but their fur patterns can vary a lot. They can be solid-colored, have one or more stripes running down their backs, and can even have spots! All of these different patterns help skunks to blend in with their surroundings and avoid predators. Nature is full of patterns - sometimes you just have to look for them!

Activity: Find different patterns in nature

- Go outside and look around nature for different patterns. Make sure to ask an adult first!
- Count how many patterns you can find.
- Take a picture of your favorite pattern and share it with us on Facebook!
